By performing an additional hot rinse at the end of the cycle this removes soap residue that can affect those with sensitive skin. Because clean clothes should sooth, never itch.

Too much foam in the washing machine can prevent the clothes from getting a proper clean, the Foam Protection system makes sure those bubbles don't become an issue.

Accidents happen in the home but with Overflow Protection the aim is to keep their impact to a minimum. In the event of a water supply problem the drain pump is automatically activated.

An uneven wash can cause damage to your machine drum. The Unbalanced Control System smartly re-distributes the contents of the drum to ensure for an even wash and damage free machine.
