Endorsed by Allergy UK this special program removes selected allergens and bacteria from the wash taking care of both your clothes and your family.

Washing Machines are not just about getting clothes clean but also looking after them to give them a longer life. The Bubble Drum is designed to be as kind to your clothes as possible while still getting them brilliantly clean.

Too much foam in the washing machine can prevent the clothes from getting a proper clean, the Foam Protection system makes sure those bubbles don't become an issue.

Designed to keep you up to speed with the progress of your laundry allowing you to get on with your day knowing exactly when everything is going to be clean and fresh.

Accidents happen in the home but with Overflow Protection the aim is to keep their impact to a minimum. In the event of a water supply problem the drain pump is automatically activated.

An uneven wash can cause damage to your machine drum. The Unbalanced Control System smartly re-distributes the contents of the drum to ensure for an even wash and damage free machine.
